/////////////////////////////////////

Self-taught front-end engineer and web designer. Recently redesigned and built the front ends for nobledesktop.com, training-nyc.com, and careercenters.com. Continue to support those sites and add new features. Proficient in semantic HTML, modern CSS/SASS, and JavaScript/ES6 with additional experience in Ruby on Rails. Currently learning React and Redux.

Experience

Front-End Developer & Designer—Noble Desktop, New York, NY
September 2017–Present

- Redesigned nobledesktop.com (100+ page Ruby on Rails website) in Sketch
- Led the front-end development of nobledesktop.com launched in July 2018
- Defined the CSS architecture and responsive layout strategy for the redesign
- Designed the UI for our new checkout process and built the front-end components

Graphic Designer—Noble Desktop, New York, NY
September 2015–September 2017

- Created new content and projects for Noble's in-house curriculum
- Created graphics and animated GIFs to promote new classes and seminars

Research & Development Assistant—iBall Instruments, Norman, OK
May 2014–June 2015

- Prototyped mechanical parts for iBall's gas chromatography equipment
- Designed electrical motor enclosure for hazardous location certification

Field Services Coordinator—Apogee Telecom, Austin, TX
August 2011–May 2014

- Submitted proposals for equipment upgrades based on network performance tests
- Managed support ticket queue and provided field support for students
